

Preamble:

Listen, i'm making this as literal as possible to make sure freaks like Stalin or whoever made Fascism doesn't ruin Intevarism for everyone, no interpretation should be available for an ideology like this, and I'm still not a Marxist, You Capitalist pigs.

## Chapter 1: Introduction

You know, a few months ago, I made a Micronation, and to accompany it, I made an ideology, which I called Intevarism..

This Ideology wasn't that bad, actually it was better than the micronation itself! The thing was, in this micronation, the Ideology was impossible to do due to restrictions and constrictions, but with a true country, a real Intevarist Society can be formed! (through creation, not reform)

If you don't know, the basic premise of Intevarism was this: "Social Credit, Democracy, Socialism, awesome." pretty simple, right? Well... I've decided to improve on this micronational ideology, and make it something bigger than "Tac'vür" could ever imagine..

To start it off, I just want to say, I'm not a Communist. The second thing I want to say is that the old "Intevarism" will now be called "Vellism", because Intevarism is not a Marxist creation, while Vellism is.

Vellism was a Teenage boy's creation after reading many Marxist writings, and it went like this:

no private property (any object that isn't public property, including personal property), no money (you'd still work but get everything for free), direct(?) democracy to ensure what the people want, and a strong central government (president). They didn't have close control on everything, and instead just had the "work hard, everything free. Work not hard, everything free but negative social credit." Social Credit in Vellism worked like this: more social credit = more effect on votes in direct democracy, and extra free stuff; less social credit = Less extra free stuff.

Extra free stuff is free stuff that isn't necessary to live. If you join the military, you'd get "eternal social credit".

Now, this seems pretty fine, but I just think it is dysfunctional and unreasonable! The issues are with voting, the private property laws, and exile. A lack of private property means no houses, which must exist in a proper society! And also, Voting everyday is practically impossible as well. So, instead, I propose Intevarism, the only way to properly do Socialism!

## Chapter 2: Problem

The problems with Capitalism and Communism are quite simple: they both are inhumane! Capitalism is leaving people to starve, and punishes the poor people for things they can't control, and Communism forces everyone under a strict dictatorship and makes them share

(basically) everything! Both cruel and heartless, so I introduce combining the best of both worlds into one.. the Freedom and Democracy of Capitalism and the Socialist aspects of Communism, to make Intevarism, where nobody will suffer (other than criminals in jail)

### Chapter 3: Belief

Intevarism is the belief that the people have the ultimate say, and that money corrupts democracy, which is true. In Intevarism, there will be no Money, but instead the Social Credit from Vellism, where the harder you work, the more Social Credit you gain, and the more free stuff you earn! But, things like food, water, and shelter will be provided regardless of employment. Not working will not lower your Social Credit, but instead we trust in the human spirit to make people want more to keep our country running! Also, in a true Intevarist Society, there will be the truest Democracy of all, Direct Democracy, which will happen monthly, where all the citizens will vote on a law.. Now, you see, this method of democracy was abandoned due to restrictions of a large country meeting in one place frequently, and how that country would be unstable, but with modern technology, Direct Democracy can be restored! But all countries need a leader, big or small, so I bring up the concept of a president into this Ideology, but in an untraditional sense... You see, Libertarians/Republicans of America have the concept of a leader with small power ruling over the country, but in an Intevarist Society, this Leader would only have control over The Army, Foreign Policies and Exchange and ambassadorship, as the representative of our wonderful country! While giving power of the military to the president in a Socialist Country sounds like a bad idea, if the idea of execution from Revolutionary France was introduced to keep the president in place, then it would work out.

### Chapter 4: Symbolism

Symbolism is a very important thing when it comes to Ideologies.. the Communists have the Hammer and Sickle, the Capitalists have the Money, the Fascists have the Swastika, and Vellism has the Yellow infinity sign on a light blue flag... well, each of these symbolizes something, the Hammer and Sickle is hard work, the Money is Money obviously, the Swastika is "Peace" and the Infinity is for everlasting Ideology... most of these are incorrect, but Intevarism has the perfect symbol with a correct meaning! The official Intevarist symbol is a Sunburst with a black Solar Cross in the middle of it, typically surrounded by Blue.. this represents the purity of Intevarism, the Peace, the Power, and the Humanity of it as well, and the Solar Cross is there to assure the men of this country that we are pure, and not Marxist scum or Capitalist scum..

### Chapter 5: Requirement

Intevarism is the Ultimate Democratic belief, it consists of Socialism, Democracy, and Humanitarian beliefs, to create a perfect society, and is the best ideology for America, or any other country.. but there is an issue.

You see, there are three things every ideology should strive to obtain; Stability/Power, Equality/Equity, and Freedom/Democracy.. but there is no possible way to have all three, leading for us to interpret which requirement is more important for the best ideology.

Examples:

Capitalism: Stable, Free

Communism: Stable (most times), Equal

Fascism: Stable

**Intevarism: Equal, Free**

In Intevarism, our top priority should be Equality and Freedom, to illustrate this, I made an equation:

$\text{Stability} < (\text{Freedom} = \text{Equality})$

What this means is basically that Freedom and Equality are equally important, but Stability is less important than either Equality or Freedom

Unfortunately, I don't want to sound Marxist or Fascist or anything like that when I say this, but most likely an Intevarist Society works best near other Intevarist Societies, so the spread of Intevarism is crucial for the best of the world.

Conclusion:

Intevarism is the ultimate form of Socialism and Democracy, which pushes for a Society made Intevarist during its creation that uses Direct Democracy, Vellism Social Credit, and has a small central government called a "president" who has control over foreign issues, military, and war, while also keeping the revolutionary idea of the killing of Dictators to create the perfect society; which is an Intevarist Society.
